

*flex*KRETE

WORLD'S BEST CONCRETE REPAIR PRODUCT

Expanding streets and bridges and keeping them well maintained is a challenge for most cities. Richardson, Texas saved time and money by using FlexKrete to overlay a lengthy concrete span that would be part of a new bridge.

City of Richardson, Texas | Street Overlay

FlexKRETE helped expedite this large-scale project.

The above image illustrates how an existing sidewalk became part of a bridge expansion project. Using FlexKRETE as an overlay material strengthens the surface, making it suitable for vehicular traffic.

Using current infrastructure to expand roads and bridges reduces the amount of construction debris to be discarded at a landfill. It also saves time and the expense of removal and rebuilding.

It's not only the smart economic choice, it's the responsible ecological choice.
